

Proven Insect Protection for Cotton

Centric® foliar insecticide provides fast-acting, longer-lasting control of a broad range of sucking insect pests in cotton, with minimal impact on beneficial insects. It offers excellent control of stink bugs, plant bugs and aphids and aids in the production of a profitable, high-yielding cotton crop. Centric is easy to tank mix and apply, and is ideal for both *Bt* and conventional programs.

Key Benefits

- Provides fast-acting, long-lasting control of yield-robbing pests including stink bugs, plant bugs and aphids
- Offers excellent tank-mix compatibility with other insecticide for hassle-free application
- Consistently controls target insects in both *Bt* and conventional cotton
- An effective rotational product for insect resistance management

Pests Controlled

- Aphids
- Brown and green stink bugs
- Cotton fleahopper
- Lygus bug
- Tarnished plant bug
- Thrips
- Whiteflies

Aphid

Green Stink Bug

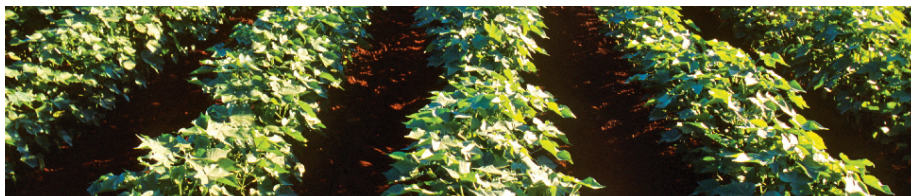

Brown Stink Bug

Tarnished Plant Bug*

Use Recommendations

- Centric insecticide should be applied at 1.25 to 2.5 oz/A by air or by ground before pests reach economic threshold.
- Do not use less than 10 GPA for ground applications and 3 GPA for aerial applications.
- Allow at least five days between applications.
- Centric may be applied up to 21 days prior to harvest.
- Check label for rates by specific pests.
