

Axial Star Herbicide

The foundation for an effective weed control program

Axial® Star herbicide serves as the foundation for an effective weed control program, helping you simplify the complexity of weed management in spring wheat (excluding durum), winter wheat and barley. Axial Star will help manage your toughest weeds while providing crop rotation flexibility next season.

A new systemic, postemergence weed management tool

- Effective uptake and systemic movement throughout the weed ensures complete control

Cross-spectrum control of grass and broadleaf weeds

- Wide application window on both the crop and weeds provides maximum flexibility
- Delivers most broad-spectrum control of mixed annual grass and core yield-robbing broadleaf weeds such as wild oat, foxtails, Italian ryegrass, Persian dandelion and windgrass
- Combines the proven performance of pinoxaden and fluroxypyr to control the core weed challenges in cereals while maintaining flexibility to tank mix with other herbicides to address the local weed spectrum
- Contains built-in adjuvant technology that enhances weed control

Excellent crop safety

- First-rate crop safety in spring wheat (excluding durum), winter wheat and barley
- Wide application window without worrying about crop safety enables flexibility to control weeds based on farm needs and consideration of potential challenges from Mother Nature

Foundation for weed control program

- Provides convenience of one product for grass and broadleaf weed control at a single use rate of 16.4 fl oz/A, removing the guesswork on what rate to choose
- Weed control in both wheat and barley allows efficient movement between crops without needing to clean the tank and switch products
- Provides control of core broadleaf weeds with the ability to customize herbicide solutions on a field-by-field basis through herbicide tank-mix partners

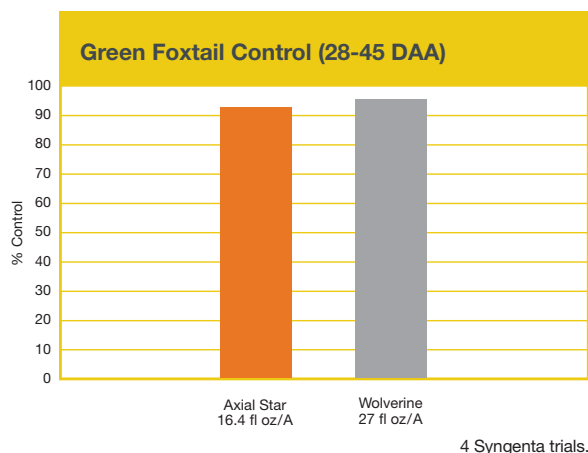

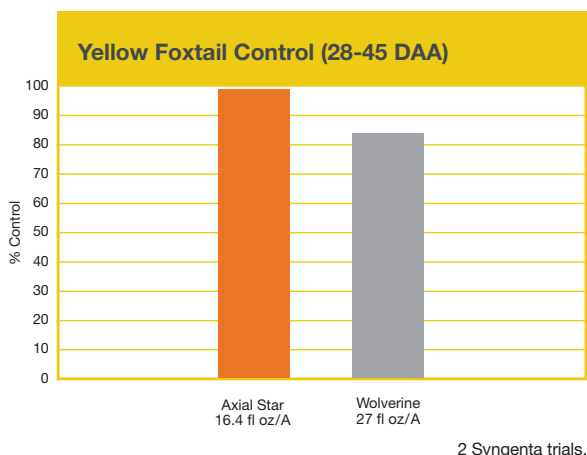

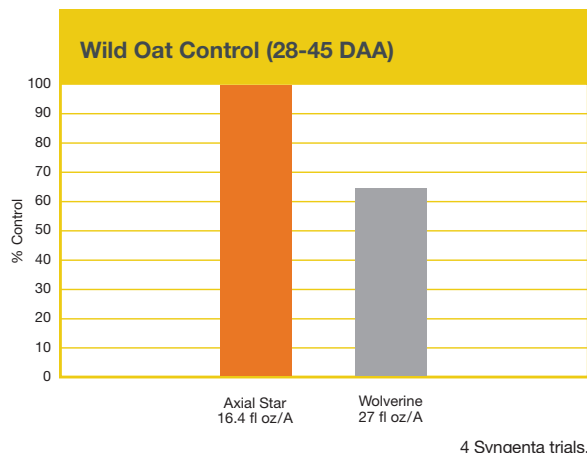

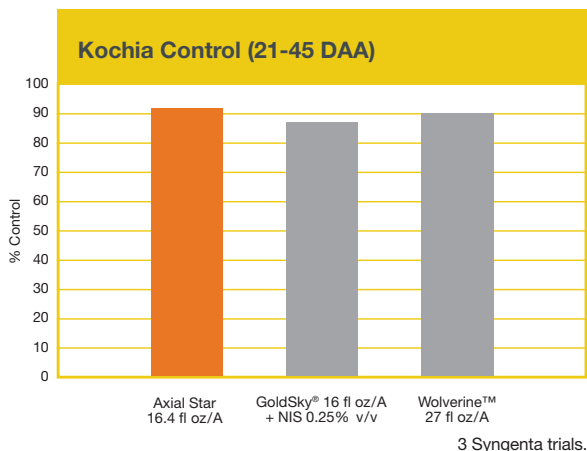

Rotational crop and tank-mix flexibility

- Delivers annual grass and broadleaf weed control without rotational restrictions the following season
- Keeps cropping options open to better react to market prices

Use Recommendations

Axial Star controls a cross-spectrum of commercially important **grass and broadleaf weeds** when applied at a single use rate of **16.4 fl oz/A** from the **2-leaf stage to pre-boot stage**.

Axial Star Performance

Weeds Controlled

Grass Weeds

- Barnyardgrass
- Italian ryegrass
- Wild proso millet
- Canarygrass
- Persian darnel
- Windgrass
- Giant foxtail
- Volunteer oat
- Yellow foxtail
- Green foxtail
- Wild oat

Broadleaf Weeds

- Catchweed bedstraw
- Kochia
- Common cocklebur
- Prickly lettuce
- Common ragweed
- Volunteer flax
- Common sunflower
