

# Axial Star Herbicide

## GRASS CONTROL AND A BROADLEAF WEED SOLUTION FOR WHEAT AND BARLEY

Axial® Star herbicide delivers effective postemergence control of grass and broadleaf weeds in cereal crops. Its advanced formulation targets key weed species, to help ensure optimal crop health and yield potential.

### FEATURES AND BENEFITS

- **Broad-spectrum Activity:** Controls a wide range of grass and broadleaf weeds, including dicamba-tolerant kochia and group 2-resistant wild oat.
- **Systemic Action:** Absorbs and translocates within the plant, providing rapid and reliable weed control.
- **Crop Safety:** Use in spring and winter wheat (excluding durum) and barley, minimizing risk to your valuable harvest.
- **Flexible Application Window:** Can be applied at various growth stages, offering convenience and adaptability to your farming schedule.
- **Tank-mix Flexibility:** Combines the proven performance of pinoxaden and fluroxypyr to control core weed challenges in cereals while maintaining flexibility to tank mix with other herbicides to address the local weed spectrum.

Untreated

## APPLICATION INFORMATION

- **Application Rate:** 16.4 fluid ounces per acre.
- **Timing:** Apply from the 2-leaf stage to preboot stage of the crop when weeds are actively growing and at the recommended growth stage for best efficacy.
- **Mixing:** Compatible with most fertilizers and other crop protection products. Always perform a jar test before mixing.
- **Reentry Interval:** 12 hours after application
- **Preharvest Interval:** 60 days for wheat and barley

### Weeds Controlled

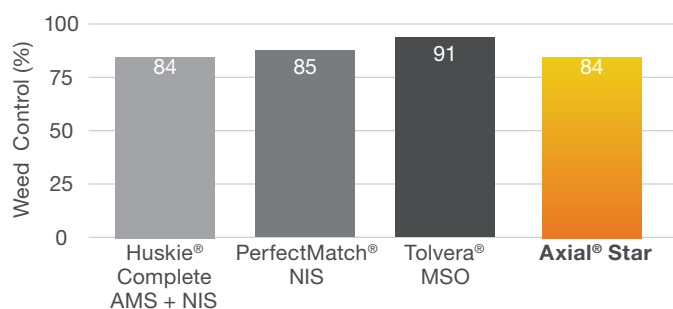

#### Grass Weeds

- Barnyardgrass
- Italian ryegrass
- Wild proso millet
- Canarygrass
- Persian darnel
- Windgrass
- Giant foxtail
- Volunteer oat
- Yellow foxtail
- Green foxtail
- Wild oat

#### Broadleaf Weeds

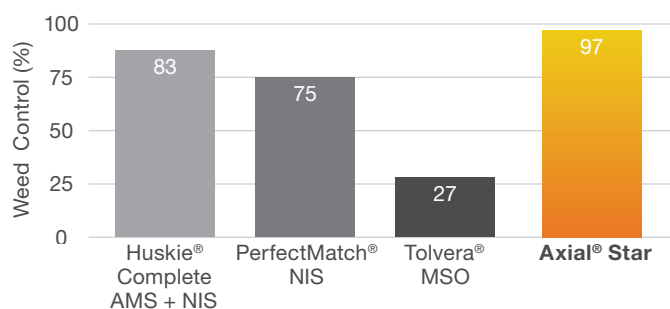

- Catchweed bedstraw
- Common sunflower
- Volunteer flax
- Common cocklebur
- Kochia
- Common ragweed
- Prickly lettuce
