

syngenta®

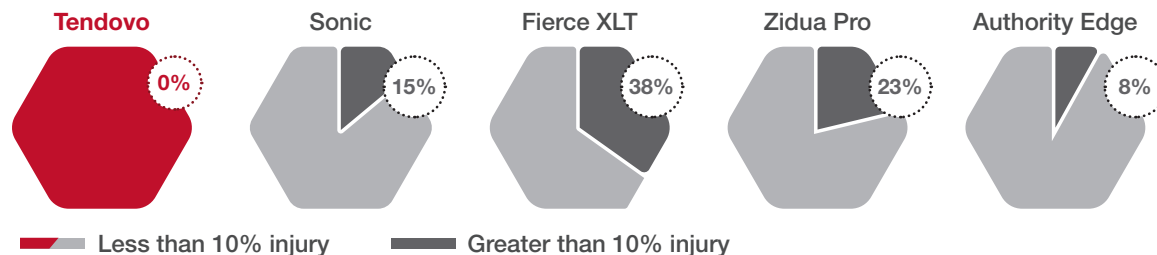

Raising the Preemergence Bar, One Clean Row at a Time.

Soybean growers know early-season weed management can make or break yield potential. But achieving adequate control can often come with unwanted herbicide damage. Until now, that is. Tendovo® herbicide introduces **redefined weed control** with **unprecedented crop safety**. Growers can get the early-season weed control they expect and say goodbye to unnecessary crop injury.

Tendovo: Start strong and stay strong

How often can your soybean herbicide selection exceed 10% injury?

2020 – Syngenta Trials - HSM052ABC4 - 2020US; 13 Locations: IN, GA, MO, NC, IA, MI (2), OH, IL (2), LA, AR, MN

The foundation of full-season soybean weed management

With unmatched residual of up to five weeks, Tendovo keeps fields cleaner longer by controlling weeds before they emerge, allowing the crop to get off to a fast start - ultimately maximizing yield potential.

A preemergence application of Tendovo can be followed by a post-emergence application of Tavium® Plus VaporGrip® Technology herbicide or Sequence® herbicide.

USE RATES

Rates will vary by soil texture:

Coarse = 1.2-1.5 qt/a

Medium = 1.5-2.1 qt/a

Fine = 1.75-2.35 qt/a

The herbicide yield-minded growers and retailers have always wanted

- ▶ Contains three complementary sites of action to keep fields cleaner, longer.
- ▶ Broad spectrum residual weed control of more than 70 weed species including: waterhemp, Palmer amaranth, giant ragweed, common ragweed, velvetleaf, morningglory, sicklepod, foxtail species, fall panicum and barnyard grass
- ▶ In university trials Tendovo helped increase potential yield by 4 to 5 bu/A compared to competitive herbicide brands³
- ▶ Combines robust use rates with unprecedented crop safety across all soil types and geographies
- ▶ Fits into any trait system, expanding the options for weed resistance management

Weeds Controlled

Tendovo controls broadleaf weeds, including:

- Waterhemp spp.
- Pigweed spp.
- Velvetleaf
- Morningglory
- Ragweed spp.
- Black nightshade
- Common lambsquarters
- Maretail/horseweed
- Sicklepod
- Prickly sida

Tendovo controls grass weeds, including:

- Barnyardgrass
- Goosegrass
- Foxtail spp.
- Crabgrass spp.
- Fall panicum

Tendovo®
2.1 qt

Zidua® Pro
6 oz

Sonic®
6 oz

Fierce® XLT
5 oz

How often will your residual provide greater than 90% annual grass control 5 weeks after emergence? In trials, Tendovo delivered 90% control, beating the competition for control of annual grass weeds.

▶ **Use Rates:** Tendovo 1.2 to 2.35 qt/a; Sonic 4.5 to 8 oz/a; Fierce XLT 3.75 to 5.25 oz/a; Zidua Pro 4.5 to 6 oz/a.

**BETTER YIELD IS THE
BETTER DEAL**

Say goodbye to crop injury and switch your early-season soybean herbicide to Tendovo for weed control without compromise. Speak to your retailer or visit SyngentaUS.com/Tendovo to learn more.
