

syngenta®

Easy on you.

Stress less about insect control in leafy green crops like lettuce and spinach with Incipio™ insecticide, powered by PLINAZOLIN® technology. Leveraging an innovative Group 30 mode of action, Incipio delivers a heavy-duty takedown of challenging foliar insect pests in leafy crops, such as thrips and leafminer. With a formulation that delivers rugged durability and impressive residual strength, Incipio takes the guesswork out of insect control so you can rest easy.

Incipio Product Features

Delivers excellent control of challenging insect pests in leafy greens, including thrips and leafminer

Is the first foliar insecticide in IRAC Group 30 with no known resistance or cross-resistance with other chemistries

Sticks to the leaf surface, demonstrating exceptional rainfastness and UV stability

Offers management flexibility through its broad-spectrum, long-lasting residual control

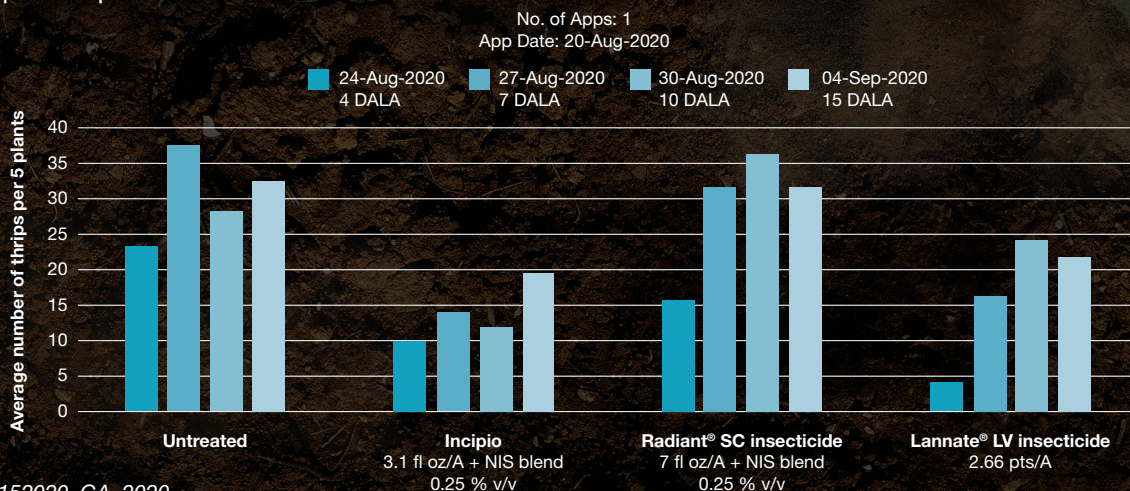

Key Insect Pests Controlled:

- Thrips
- Leafminer

Western Flower Thrips Control in Lettuce

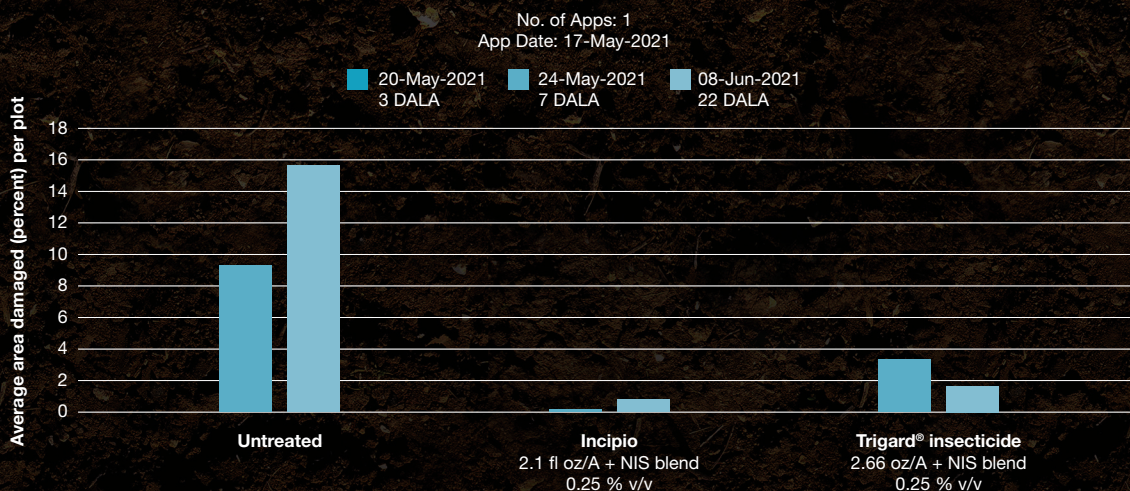

In a trial testing against western flower thrips on lettuce, lettuce treated with Incipio had fewer thrips per five plants than untreated lettuce.

Trial: USWB012152020. CA, 2020.

Leafminer Control in Spinach

In a trial testing against leafminer on spinach, plants treated with Incipio had less average percentage area damaged per plant than untreated spinach and spinach treated with alternative products.

Trial: USWF016442021. Richland, WA; 2021
