

MIRAVIS PRIME FUNGICIDE FOR PECANS

For excellent control of pecan scab, powdery mildew and other common tree nut diseases

Miravis[®] Prime fungicide, registered for use on pecans, combines two powerful active ingredients, ADEPIDYN[®] technology (FRAC Group 7) and fludioxonil (FRAC Group 12), to help growers protect their yield potential from disease.

UNTREATED

TREATED

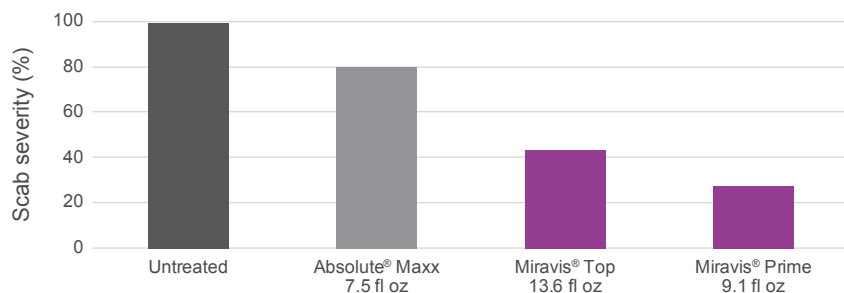

Diseases Controlled:

- Downy spot
- Liver spot
- Powdery mildew
- Vein spot
- Zonate leaf spot
- Pecan scab

Technical Features:

- Taking power, spectrum and stamina to the max, Miravis Prime fungicide delivers higher quality crops at harvest by combatting key diseases in pecans
- Accumulates heavily into the wax layer and translocates through the leaves
- Complements integrated pest management spray programs
- Remains stable on the leaf surface for even distribution and protection
- Delivers high potency and durability
- ADEPIDYN[®] technology, a component of Miravis Prime and a carboxamide SDHI, delivers exceptional disease control

Year-end pecan nut scab severity (Aug 24)

Trial conducted by the University of Georgia in 2021. Products were applied 5 times each in alternation with Super Tin® 4L (6 fl oz) + Elast® (25 fl oz). 10 total sprays. Applications began April 16. Applied at 95 GPA with an air blast orchard sprayer. Scab severity rating: 8 terminals per tree (% shuck covered with scab).
