

# Relieve tree stress for a healthier orchard from root to fruit

You're in your groves day-in and day-out, which makes slow decline in health more difficult to see. Visible symptoms of disease may take years to show what's been brewing under the surface, diminishing overall health over time while growth and yield potential suffer. Effective, consistent control is key to a healthier orchard from root to fruit.

Orondis® fungicide protects developing citrus root systems against oomycete diseases, like *Phytophthora* root rot, by reducing the number of viable *Phytophthora* propagules in the soil, which in turn reduces inoculum potential. Fewer pathogens lead to stronger root development and, ultimately, healthier trees.

## Why Orondis?

- ✓ Reduce propagule count and inoculum potential in the soil
- ✓ Increase root mass for better nutrient and water uptake
- ✓ Utilize preventive disease control
- ✓ Reap the benefit of residual disease control
- ✓ Introduce a unique mode of action, Group 49
- ✓ Deliver high intrinsic activity to citrus trees
- ✓ Improve resistance management
- ✓ Build a greater opportunity for higher yield and quality because of more efficient water and nutrient use and increased root health
- ✓ Rotate with Ridomil Gold® SL fungicide for best-in-class *Phytophthora* control

## Diseases Controlled

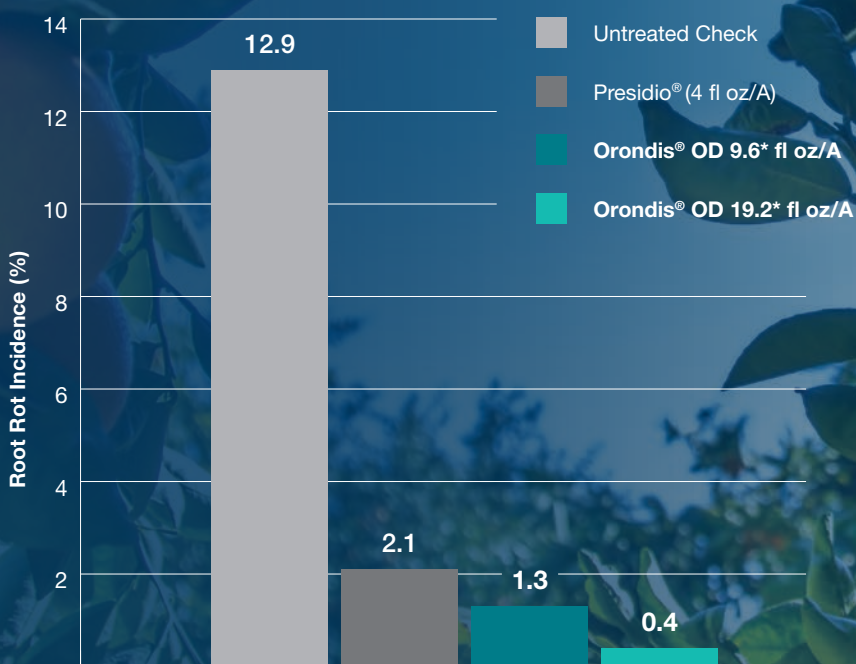

- ✓ Brown rot
- ✓ Citrus foot rot
- ✓ Gummosis
- ✓ Root rot
- ✓ Trunk canker (*Phytophthora* spp.)

# Recharge Your Roots For Healthier Trees and Higher Yield Potential

*Phytophthora* can be a silent killer, stealing water and nutrients needed for tree productivity, health and longevity—especially in younger trees. *Phytophthora* species are prolific spore producers, increasing the impact and spread of damaging diseases, including root rot, foot rot and brown rot. One of the most devastating aspects of this pathogen is that it can be unintentionally introduced and re-introduced through water sources every year, making annual soil testing imperative.

## Orondis Delivers Outstanding Control of Phytophthora Root Rot in Citrus

\*Orondis OD contains half the a.i. as Orondis per fl oz.

Thus, Orondis OD 9.6 fl oz/A rate is equivalent to Orondis 4.8 fl oz/A and Orondis OD 19.2 fl oz/A rate is equivalent to Orondis 9.6 fl oz/A.

Orondis promotes root health for better water and nutrient use efficiency and to support young grove establishment

Talk to your local retailer or Syngenta representative about how Orondis fungicide can support your disease management program or visit [SyngentaUS.com/Orondis](https://SyngentaUS.com/Orondis).
