Increase Crop Yield

YieldON[™]

Increase Row Crop Yield

YieldON[™] promotes **grain fill** and enhances **yield** and **test weight** by optimizing the plant's ability to utilize nutrients and move sugars into the grain.

Key Benefits

Better Transport:

Improves uptake and transport of sugars and nutrients.

Promotes Cell Division:

Better cell division and expansion lead to denser and larger seed development.

Proven Science:

Components assessed using GEAPower[™] technology to tailor composition for functionality.

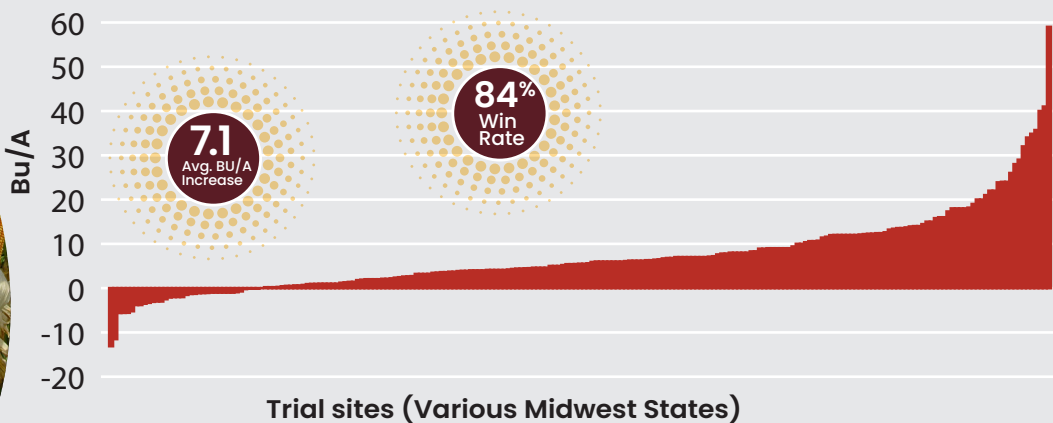

Compatibility:

Tank mix compatible.

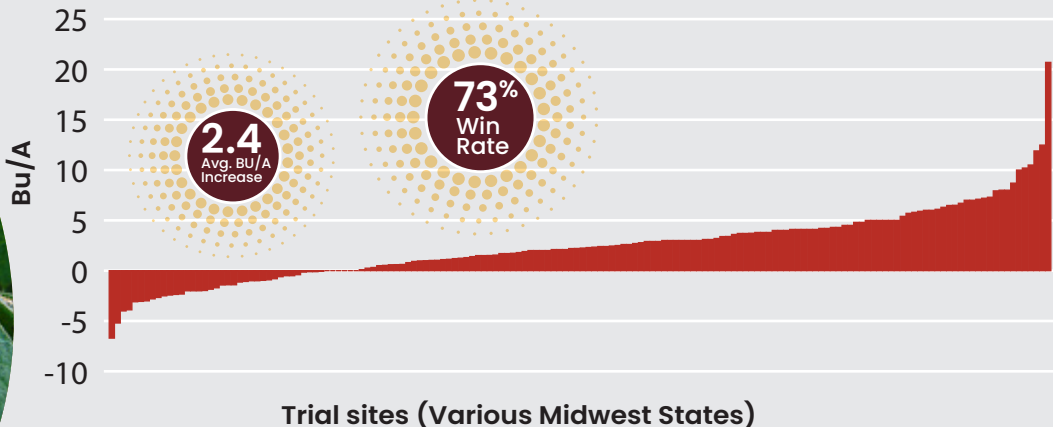

2016–2024 Corn Yield Response

225 Trials Across the Midwest

2016–2024 Soybean Yield Response

163 Trials Across the Midwest

Application & Rates

Corn
1–2 applications
1.5 pts/a
During V6–R2

Soybean
1–2 applications
1.5 pts/a
During R1–R4

Wheat
1–2 applications
1.5 pts/a
From flag leaf through anthesis

Classification: Public
