

# WHEN THE GOING GETS TOUGH, ZIVALGO KEEPS GOING

It's a long road to harvest, but **Zivalgo**<sup>™</sup> insecticide is here to help you go the distance. Powered by PLINAZOLIN<sup>®</sup> technology, an innovative Group 30 mode of action, Zivalgo controls tough foliar insect pests like Colorado potato beetle and more so that crops remain clean and productive. With a formulation that delivers high efficacy, rugged durability and impressive residual control, Zivalgo protects potato crops until the finish line, preserving marketable yield potential for a winning end to the season.

## Product Features

Demonstrates excellent rainfastness and UV stability

Is the first foliar insecticide in IRAC Group 30, with no known resistance or cross-resistance with other chemistries

Offers pest management flexibility through its broad-spectrum, long-lasting residual control

Provides excellent control of challenging insect pests in potato crops, including Colorado potato beetle, potato leafhopper and more

## Zivalgo Keeps Potatoes in the Lead Against Colorado Potato Beetle

An Oregon trial shows significantly less feeding damage from Colorado potato beetle in potatoes treated with Zivalgo in comparison to untreated potatoes.

Untreated

Zivalgo

## Key Insect Pests Controlled:

- Colorado potato beetle
- Potato leafhopper
- European corn borer

## Leave Colorado Potato Beetle Larvae in the Dust

A New York trial shows potatoes treated with Zivalgo resulted in fewer Colorado potato beetle larvae per 10 stems in comparison to untreated potatoes and potatoes treated with Blackhawk® insecticide.
