Exciting Genetics with a Distinguishing Ear Type and Grain Quality

- Taller plant type with solid roots and stalks for season-long standability
- Dependable Goss's Wilt and Tar Spot tolerance for high disease pressure acres
- Outstanding emergence with very good early-season vigor allows for early planting

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
