### Excellent Yield Potential with Artesian Technology

- Strong disease package and plant health provide crop rotation flexibility
- Dependable stalks and roots that allow for population flexibility across all environments
- Consistent performance across all soil types

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
