LIBERTY Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphose in corn and soyloans, and comfine highly-leiding genetics with the powerful, non-selective, posternergerit weed control of Liberty® herbicide for oppirum yield and excellent weed control.

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available, NA = Not Applicable.

Adaptation and Responses: Best > Good > Fair > Poor.
R = Resistant, S = Susceptible.

\* Represents an assessment of stand establishment, chlorosis severity and yield performance

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
