Excellent Yield Potential with Versatility Across Variable and Drought-prone Soils

- Strong emergence that allows for early planting in cool soils
- Sound stalks and staygreen for late-season standability
- Semi-flex ear allows for plant population flexibility

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
